Education

B.Tech in Computer Science and Engineering

Noida Institute of Engineering and Technology

2022 – 2026

Greater Noida | CGPA: 7.8

Intermediate (Class XII), CBSE

Tiny Tots School

2021

Ayodhya | Percentage: 88.6%

Secondary School (Class X), CBSE

Tiny Tots Sr. Sec. School

2019

Ayodhya | Percentage: 88.16%

Technical Skills

Languages: Java, Python, SQL

Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

Libraries: NumPy, Pandas, Matplotlib, Scikit-learn

Databases: MySQL

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Power BI

Training

Machine Learning Training | Pyramid, at NIET

- Completed hands-on machine learning training covering supervised learning, model evaluation, and data preprocessing using Python-based ML workflows.
- Built 2+ mini-projects applying supervised learning techniques and real-world data processing on practical datasets.
- Gained practical exposure to feature engineering, model evaluation techniques, and data preprocessing as part of hands-on ML exercises.

Projects

Resume Analyzer | Python – GitHub

- Developed a Python-based resume analyzer that performs text processing and information extraction to identify key skills from resume content.
- Implemented rule-based keyword matching to compare extracted skills against job descriptions and detect alignment gaps.
- Generated structured feedback highlighting skill alignment and improvement areas to guide resume optimization.
- Designed the application with a modular workflow for resume parsing, skill extraction, and job-description comparison, improving code maintainability.

Mini Search Engine | Java, TF-IDF, Information Retrieval

- A Java-based search engine supporting document indexing, keyword search, and ranked retrieval using an inverted index.
- Implemented TF-IDF weighting and cosine similarity to improve search relevance and generate accurate ranked results.
- Designed and implemented the core architecture for document indexing, keyword search, and relevance-based result ranking using Java.

Consumer Behavior Analysis | Python, Power BI

- Analyzed retail customer transaction data using Python to identify shopping patterns, purchase trends, and customer segments.
- Built interactive Power BI dashboards to visualize key metrics, enabling clearer interpretation of consumer behavior for business decisions.

Certifications

- Coursera:** Python Basics, Python for Data Science, AI & Development, Introduction to AI, Algorithmic Toolbox, Data Structures
- Infosys Springboard:** Java Programming Fundamentals, Database Management Systems

Leadership / Achievements

- Solved 200+ Data Structures and Algorithms problems across LeetCode, CodeChef, and other coding platforms.
- Co-authored an academic research paper on **TF-IDF-based Fake News Detection** as part of the undergraduate college project.
- Head Coordinator, Megapixel Club (Photography Club), NIET** – Led a student team in organizing photography events, competitions, and club activities while coordinating event planning and execution.
- Awarded **"Photographer of the Month"** three times in recognition of creativity and technical photography skills.
